SUMMARY

As a dedicated software engineer with nearly 5 years of programming experience, I specialize in backend development, database management, mobile application creation, and have a proven track record in developing web and mobile applications. My technical proficiency spans across Flutter/Dart, Node.js, React, Java, SQL and Git, enabling me to leverage these technologies effectively in project development. Known for my high work discipline, I thrive in team environments and proactively engage in research and inquiry to overcome challenges and enhance project outcomes.
